Docket No. BOC9-1999-0092 (145)

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

ਪੁੱਛੇ Application of Brocious, et al.

Sérial No.:

09/770,577

Examiner:

Smits, Talivaldis I.

Confirmation No.:

7601

Date Filed:

January 26, 2001

Group:

2641

For:

SPEECH AUTO-COMPLETION FOR PORTABLE DEVICES

DECLARATION UNDER 3 'C.F.R. § 1.131

HELEIVEL

Commissioner for Patents Washington, DC 20231

SEP 0 8 2003

Technology Center 2600

Sir:

- I, Larry A. Brocious, a citizen of the Unite I States of America, residing at 5402 Pennsylvania Avenue, Apalachin, NY 13732, hereby declare and state as follows:
- 1. I was employed by International Bu siness Machines Corporation (IBM) in Armonk, New York at the time the above-identified application was conceived. I make this declaration in support the above-identified application.
- 2. IBM had invested substantial time and effort into the research, development, and marketing of their products, and in an effort to protect its rights in all new inventions, IBM requests that all employees prepare and submit confidential Invention Disclosure Forms upon conception by the inventor(s).
- 3. As a named co-inventor for this invention, I submitted the attached Invention Disclosure No. BOC8-1999-0095 togetl er with my co-inventors, Jonathan L. Gabel, David C. Loose, Ronald Van Buskirk, Huifeng Wang and Steven G. Woodward.
- 4. I make this Declaration to establish that the other co-inventors and I conceived of the present invention at least as early as August 18, 1999, and exercised due diligence from that date to January 26, 2001, the filing date for the above-identified patent application.
- 5. I further declare that all statements made herein of my own knowledge are true and all statements made on information and belief are believed to be true and

Certificate Under 37 CF R 1.8(a)

I hereby certify that this correspondence is being deposite with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to: Commissioner for Patents, Washington, DC 20231, or facsimile transmitted to the U.S. Patent and Trademark Office or the date shown below.

9/2/03 Date

Kevin T. Cuenot, Esq iire

__, Reg. No. 46,283

{WP137704;2}

Declaration Under 37 C.F.R. §1.31 U.S. Patent Appln. No. 09/770,577

Jocket No. BOC9-1999-0092 (145)

further that these statements were made with the cnowledge that willful false statements and the like so made are punishable by fine or imprisonment or both under Section 1001 of Title 18 of the United States Code, and hat such willful, false statements may jeopardize the validity of the above-identified patent application or any patent issuing thereon.

Larry A. Procious

Main Idea

*Title of disclosure (in English)

Speech Autocompletion For Embedded Devices

*Idea of disclosure

1. Describe your invention, stating the problem solved (if appropriate), and indicating the advantages of using the invention.

One of the problems with small handheld devices is that it is difficult to enter data into them because they do not have a full-size keyboard. Speech recognition is an excellent solution. Unfortunately speech recognition on small devices is often limited because of the low processing power that these devices have. A speech recognition engine might support 200 phrases but this doesn't help if the user has to select from

This method is much faster than many text entry methods currently employed.

2. How does the invention solve the problem or achieve an advantage, (a description of "the invention", including figures inline as appropriate)?

As an example of the invention imagine if the user had to pick a street name from a city such as Miami which has 10,000 street names, but the recognizer only can contain 250 entries. The user would be prompted to input data with a slower alphabetic entry method (handwriting recognition, speech alphabet spelling, on-screen keyboard, menu selection, etc.) If the user's destination was a street called Poinciana Blvd they would begin by entering P - O -.... As they entered each letter it would narrow down the possibilities. For example there are 1,000 streets that begin with P, and 125 streets that begin with PO.

When the number of streets was sufficiently narrowed by entering the text, it would preferably beep, or otherwise notify the user that at any point they could speak the rest of the phrase rather than going through the cumbersome text entry method.

- 3. If the same advantage or problem has been identified by others (inside/outside IBM), how have those others solved it and does your solution differ and why is it better?
 Others have solved the problem of selecting from a list with an embedded recognizer with limited processing power with three methods:
- (1) By forcing the user to spell out the word, using either a military alphabet or using the standard alphabet and matching the recognized letters to the closest match in the database.
- (2) Through the use of a set of menus.
- (3) By forcing the user to use only manual entry.
- 4. If the invention is implemented in a product or prototype, include technical details, purpose, disclosure details to others and the date of that implementation. Not implemented to date.

On what date was the invention workable? 08/03/99 Please format the date as MM/DD/YYYY

*Critical Questions (Questions 1 - 7 must be answered)

*Question 2 Is there any planned or actual publication or disclosure of your invention to anyone outside No IBM? If yes, Enter the name of each publication or patent and the date published below. Publication/Patent: Date Published or Issued: Are you aware of any publications, products or patents that relate to this invention? O Yes No If yes, Enter the name of each publication or patents that relate to this invention? O Yes No If yes, Enter the name of each publication or patent and the date published below. Publication/Patent: Date Published or Issued:

*Question 1

		- 12
*Question 3		. O Yes
Has the subject matter of the invention o	r a product incorporating the invention been sold, us	sed No
internally in manufacturing, announced for		
Is a sale, use in manufacturing, product a		O Yes
is a sale, use in manufacturing, product of	announcement, of proposal planned:	
		● No
If Yes, identify the product if known and i	ndicate the date or planned date of sale, announcem	nents, or
proposal and to whom the sale, announc	ement or proposal has been or will be made.

problem. Alternatives have drawbacks em. No feasible alternatives fices lack resources to support large-vocabulary litton. Authors present clever method of getting hints that winnow the vocabulary. This makes something therwise would not be. Another of looking at it: this thieves higher accuracy, as hints from end user tell ce which words to ignore when trying to match internal vocabulary.
mbedded devices for do something that has large

FACTOR 4 - USE BY OTHERS	Unlikely
	Probable
	O Very likely
	O Definite
Reason(s) for above answer: (If use is Probable or Definite, please specify why the innovation will be used by others, which type of companies and which type of products).	handheld devices that do voice reco will benefit from this method, if they support applications with large vocabularies - proper names (people, cities, streets) especially.
FACTOR 5 - DISCOVERY OF NON-IBM (NI) USE	O NI must admit use for IBM to know
	Teardown" of NI product would be necessary
4	Careful analysis of NI product or manual required Use obvious to casual observer
Reason(s) for above answer (how would we detect use of invention tothers)?	authors describe a user input method, observable by all
FACTOR 6 - ADEQUACY OF DESCRIPTION	O Inadeqate: Invention unclear from description
	O Incomplete Invention aspect poorly described or obscure
	O Further clarification or implementation detail needed
Description in the second seco	Clear and complete as is
Reason(s) for above answer.	
FACTOR 7 - PEOPLE CONSULTED	
Inventors (s)	O Yes ● No
If "No", please give the reason(s) why inventor(s) were not consulted.	clearly presented as is
Name others consulted:	
Discussed evaluation and recommendation with inventors?	○ Yes ● No
